KHIE and CHFS Cabinet Resources - The Advantage

KHIE is the resource for Cabinet data

3 years of Medicaid Claims Data

State Laboratory Results

Newborn Screenings

All other legally available state lab tests available

Immunization Registry

In production in pilot stage

Electronic Update only via KHIE

Future interfaces with Public Health

Reportable Disease transport to DPH/CDC

Provide HIE Connectivity

**to as many providers as
possible**

over the next two years

**with little or no startup cost to
the providers**

- **Continue the on-boarding process**
 - Outreach Coordinators
- **Provide technology to ‘fit’ the data provider**
 - Using Edge Server allowing access to the Virtual Health Record (EdgeServer provided)
 - Using CCD (Continuity of Care Document)
- **Working with EHR Vendors statewide**
- **Working with the ONC and other States on the interstate and national solution**

- **ADT's/Demographics**
 - Populate the Community/Master Patient Index
- **Record Locator Service**
 - Locates all the patient encounters
 - Consolidates patient information for presentation to the provider
- **Access**
 - KHIE Community Portal/Virtual Health Record
 - Provider EHR Portal/Dashboard

40 Hospitals paid	\$32.0 million
304 Providers paid	\$6.5 million
